SUMMARY

4 years of experience as a software engineer/cloud engineer with expertise in building and deploying scalable applications in a variety of programming languages and cloud platforms. Strong understanding of cloud infrastructure, containerization, and automation tools. Proven track record of delivering high-quality software on time and on budget.

EXPERIENCE

Software Developer,   August 2019 - September 2020

Alabian Solutions   Lagos, Nigeria

- Led the development of several successful software projects using cutting-edge technologies such as Python, Java, and JavaScript.
- Demonstrated my expertise in machine learning and data analysis, resulting in improved business performance for clients.
- Implemented agile development methodologies to increase efficiency and productivity within the team.
- Built and maintained strong relationships with clients and stakeholders, resulting in repeat business and positive feedback.

Software Engineer   November 2020 - April 2021

Donkor Labs   Accra, Ghana

- Collaborated with cross-functional teams to understand business objectives and provide tailored AI solutions.
- Developed and implemented AI solutions for clients using technologies such as TensorFlow and PyTorch.

Python Developer/Data Engineer   June 2021 - Present

Heny   Accra, Ghana

- Developed and maintained web scraping scripts using Python and libraries such as BeautifulSoup and Selenium.
- Built and deployed web scraping pipelines and automated the data collection process.
- Developed and maintained various software applications using Python and its frameworks such as Django and Flask.
- Implemented software development methodologies such as Agile and Scrum to deliver high-quality software solutions.

Cloud Engineer   August 2022 - Present

Jaytech Solution   Accra, Ghana

- Designed and implemented highly available and scalable systems using AWS services, including EC2, S3, RDS, and CloudFront.
- Utilized automation and scripting tools such as Terraform and Ansible to manage and provision AWS infrastructure.
- Assisted in the migration of on-premise applications to the AWS cloud, reducing costs and increasing efficiency.
- Collaborated with development teams to implement best practices for security and compliance in AWS environments.

EDUCATION AND QUALIFICATION

- Bachelor of Engineering Computer Engineering - University of Ghana   2023
- Enterprise Design Thinking - IBM   2023
- Advanced Diploma in Python - Allison   2022
- Software Engineering - ALX   in progress
- Cloud Solutions Architect - Amazon   in Progress

Skills

- Python
- Django
- Cloud Computing(AWS)
- Representational State Transfer (REST)
- Artificial Intelligence/Machine learning.
- Data Science
- Git
